

AVENGERMS 40SL

TECHNICAL DATA SHEET

1) Features

- Avengerms 40SL is a powerful antibacterial, antiviral, and anti-algae agent based on benzalkonium chloride.
- The quaternary ammonium chloride chemical structure provides potent disinfecting ability through breakdown of the cell walls of bacteria.
- Registered for the control of *Ralstonia Solanacearum* (Moko Disease) and *Fusarium Oxysporum* (Panama Disease)
- Can be used to disinfectant tools used in plantations and as a general disinfectant.

2) Benefits

- Strong cationic characteristics allow use over a wide range of pH values and water hardnesses.
- Safe to use when used in accordance with the instructions and safe for the environment.

AVENGERMS 40SL

3) Composition

Active Ingredients	By Mass
Benzalkonium chloride	40% min.
Inert Ingredients	Balance to 100%

4) Application

Avengerms 40SL is a powerful disinfectant against a broad spectrum of bacteria and other infectious organisms which can cause serious damage to various crops including those grown in plantations.

Avengerms 40SL is registered in the Philippines for the control of Moko and Fusarium oxysporum. Drip irrigation or drenching of soil prior to planting has been found to control many soil-borne organisms which can affect farm efficiencies.

It can also be used as a general disinfectant for tools and equipment used by growers and farmers.

AVENGERMS 40SL

5) Directions for use

Dilute with water as per the concentration recommended and spray or drench the affected area as appropriate.

General Use	20-25ml per litre
Fungus Control	20-30ml per litre
Soil Disinfection	20-40ml per litre
Moko Control	20-40ml per litre
Tool disinfection	5-10ml per litre

6) Supplier / Manufacturer Information

Supplied By:

AgroAdvanced International Philippines Inc.

3/F Vicente Madrigal Building

6793 Ayala Avenue, Makati City 1229
