

TURBO 5G

TECHNICAL DATA SHEET

1) Features

- Turbo 5G is a broad-spectrum carbamate insecticide, acaricide and nematicide formulated as a granule with active ingredient Carbofuran.
- The mode of action is through cholinesterase inhibition and is absorbed through the stomach and contact.
- Used to control corm weevils, root worms, wire worms, mites, thrips, and nematodes.

2) Benefits

- Provides an economical method to control a wide range of pests.
- Safe to use when used in accordance with the instructions.

3) Composition

Active Ingredients	% by Mass
Carbofuran	5% by mass
Other Ingredients	Balance to 100%

4) Applications

- Turbo 5G is a powerful carbamate based broad spectrum nematicide, miticide, thripicide and insecticide.
- It provides a quick knock-down effect and is effective in banana plantations for the control of nematodes.
- It can also be used for general pest control in other crops in accordance with the label instructions.

TURBO 5G

5) Directions for use

For the control of Nematodes & Weevils in bananas

- At planting time Use 25 to 30 grams of TURBO 5G per mat or per unit of production. Apply to the planting holes. Replace the holes with soil.
- Established planting Use 40 to 50 grams of TURBO 5G per mat. Put the granules around the base of the plants (if possible, use the poke hole method). Repeat application after 4 to 5 months or depending upon the plantation standard practice.
