

## **TURBO 10G**

# **TECHNICAL DATA SHEET**

### **1) Features**

- Turbo 10G is a broad-spectrum carbamate insecticide, acaricide and nematicide formulated as a granule with active ingredient Carbofuran.
- The mode of action is through cholinesterase inhibition and is absorbed through the stomach and contact.
- Used to control nematodes, corn weevils, root worms, wire worms, mites, and thrips.

### **2) Benefits**

- Provides an economical method to control a wide range of pests.
- Safe to use when used in accordance with the instructions.

### **3) Composition**

<b>Active Ingredients</b>	<b>% by Mass</b>
Carbofuran	10% by mass
Other Ingredients	Balance to 100%

### **4) Applications**

- Turbo 10G is a powerful carbamate based broad spectrum nematicide, miticide, thripicide and insecticide.
- It provides a quick knock-down effect and is effective in banana plantations for the control of nematodes.
- It can also be used for general pest control in other crops in accordance with the label instructions.

## **TURBO 10G**

### **5) Directions for use**

#### **For the control of Nematodes & Weevils in bananas**

- At planting time Use 15 to 20 grams of TURBO 10G per mat or per unit of production. Apply to the planting holes. Replace the holes with soil.
- Established planting Use 20 to 30 grams of TURBO 10G per mat. Put the granules around the base of the plants (if possible, use the poke hole method). Repeat application after 4 to 5 months or depending upon the plantation standard practice.

### **6) Supplier / Manufacturer Information**

#### **Supplied By:**

AgroAdvanced International Philippines Inc.  
3/F Vicente Madrigal Building  
6793 Ayala Avenue, Makati City 1226

#### **Warranty Statement:**

**It is a violation of EPA rules and regulations to use this product inconsistent with the label. No warranty of any kind expressed or implied is made concerning the use of this product. The user assumes all risks and liabilities resulting from improper handling, use or application.**
