AGRO ADVANCED INTERNATIONAL PHILS. INC.

# XILOTROM

- Powerful broad spectrum biorational fungicide
- Prevents spore germination
- Degrades the cell wall of the fungus
- No residues / No safe term
- No pre-harvest interval

arvensis

AGRO ADVANCED INTERNATIONAL PHILS. INC.

arvensis

# XILOTROM

**XILOTROM** is a powerful broad spectrum biorational fungicide formulated with vegetal extracts and essential oils, particularly derivatives of eucalyptus oil which is universally recognized for its antifungal properties. It also contains various secondary metabolites made up of numerous enzymes (cellulases, chitinases, lipases.) which help fight fungal infection. **XILOTROM** is effective in controlling heart and root rot caused by Phythophthora spp and white leaf spot caused by Chalara(Thielaviopsis) in pineapple.

## HOW DOES IT WORK?

Substances obtained through the selective extraction of essential oils from plants of the myrtaceae family, combine to attack fungi from different fronts. These include enzyme derivatives, carriers and alkaloids which have separate functions which together lead to the ultimate death of fungal cells.

- Breaks down the cell wall
- Interrupts cellular respiration and lipid synthesis
- Prevents division and propagation
